runway look we love:

hot pink for fall

Innocent yet sexy, colorful yet somehow natural, all over the runways yet totally down-to-earth, this was hands-down the most flattering trend at the autumn/winter collections. The hot pink brightens up your face, but the dewy texture ensures that it looks natural, no matter what your skin type or shade. Dot the cream on at the apples of your cheeks, blending with your fingers or a large, fluffy, regular-blush brush. Add more only if you don't instantly feel 5,000 times prettier and more awake.
